## EDUCATION

---

### Kean University

*Bachelor of Science in Computer Science*

Union, NJ

*Sep. 2022 – Dec. 2025*

## EXPERIENCE

---

### Because She Can Mentorship Program

*Because She Can*

May 2025 - August 2025

*Virtual (Ghana-based)*

- 12-week fully-funded mentorship program for women in technology.
- Received personal mentorship from industry experts in order to develop skills in software development with focus on .NET based applications.

### Barista

*Starbucks*

June 2021 – October 2024

*Piscataway, NJ / Princeton, NJ*

- Analyze customer needs in order to solve problems. Emphasis on constant learning, as well as adapting to new situations.
- Memorization of core recipes in order to procure consistent, enjoyable products.

### AI4ALL College Pathways Participant

*AI4ALL*

Feb. 2023 – May 2023

*Virtual (California-based)*

- Learned about the applications and fundamental technical concepts of AI including types of machine learning, gradient descent and neural networks.
- Investigated ethical implications related to data processing and AI implementation.
- Collaborated with peers on Suisoku, an AI that predicts anime based on select criteria given to it, and by use of Decision Tree Algorithms in order to come to conclusion.

## PROJECTS

---

### auraa.tech | *SQL, XAMPPS, VSCode, Bootstrap, JavaScript, HTML/CSS*

January 2025 – March 2025

- Portfolio landing page. Animated using JavaScript event listeners, object pools, and observers. Custom artwork and sprites.
- Integration of email database using mySQL Workbench. POST authentication.

### Database Application | *C#, SQL, VSCode, VS, Azure*

January 2024 – May 2024

- Database management System with user authentication features and CRUD functionality developed in C#.
- Integration of SQL database for record management, ensuring data integrity and security. Front-end developed using HTML/CSS.

## TECHNICAL SKILLS

---

**Organizations:** WiCYS, Kean Esports

**Languages:** Java, Python, C#, SQL, JavaScript, HTML/CSS

**Frameworks:** .NET, Blazor, Bootstrap

**Developer Tools:** Git, VS Code, Visual Studio, PyCharm, Azure, Eclipse

**Libraries:** pandas, NumPy, Matplotlib
